Creating a RefWorks account

1. When creating your user account, make sure that you're in the University of Turku network area or in remote access via VPN connection: https://intranet.utu.fi/en/unit/it-services/devices/remote/Pages/home.aspx

2. Go to RefWorks login page and choose 'Sign Up for a New Account'.

3. Fill the required information. Please note that only @utu.fi or @tyks.fi e-mail addresses will be accepted. You can choose whatever login name and password you wish but it is recommended that you do not use your utu-password as you RefWorks password. After filling the information choose 'Next'.
4. Write your name and select the area of focus and type of user. Choose ‘Create Account’

After creating an account you will receive an e-mail confirmation of your login name and password. The e-mail also contains Group code which you may need when logging in to Write-n-Cite program.

You can create multiple RefWorks accounts with the same e-mail address by creating a new login name and password.
